

TARANG SHAH

+1 412-692-0675 | tarangs@cmu.edu | tarangshah.com | linkedin.com/in/tarang27 | github.com/t27

Education

Carnegie Mellon University - School of Computer Science (Robotics Institute)

Pittsburgh, PA

MASTER OF SCIENCE IN ROBOTIC SYSTEMS DEVELOPMENT

Aug 2019 - May 2021

BITS Pilani (Birla Institute of Technology & Science, Pilani)

Pilani, India

BACHELOR OF ENGINEERING IN ELECTRONICS AND INSTRUMENTATION

Aug 2011 - May 2015

- Worked on various cross discipline projects and courses
- Projects include Gesture Recognition, Humanoid Robotics, Computer Vision, Machine Learning, Electronics

Work Experience

HERE Technologies

Mumbai, India

SENIOR DATA SCIENTIST

Jul 2019 - **Aug 2019**

SENIOR SOFTWARE ENGINEER

Oct 2018 - Jun 2019

SOFTWARE ENGINEER II

Apr 2017 - Sep 2018

- Worked at the Map Creation team, built Deep Learning based vision models and tools to automate creation of maps from street images
- Managed tools and systems for training data storage, annotation and sampling
- Managed jobs for user annotation using both custom and commercial annotation services
- Built deep learning models & services for detecting 300+ traffic signs in street images using TensorFlow Object Detection framework(based on Faster-RCNN, SSD). Helped increase Recall and Precision to 80%+. Deployed on cloud and mobile products
- Designed and implemented software for smart sampling of training data across multiple classes for balanced training
- Designed and created pipelines and cloud infra for automating the data prep, training and evaluation of computer vision models to reduce prep time by 4X and reduce errors
- Built proof-of-concept for multimodal models with image & map data. Awarded 'Significant Development' prize (cash prize) for patentable IP
- Designed, built and deployed a service for highway sign parsing(OCR, scene text and icon extraction) and reduced manual transcription effort by 5X for each user
- Recognized multiple times with 'Star Of the Month' and 'Innovation Awards'

Octoloo Systems

Gurgaon, India

CO FOUNDER

Apr 2016 – Mar 2017

- Octoloo Systems built robots for industries and warehouses. Our first product was for automated picking in factories and warehouses
- Built an industrial robotic arm for Pick and Place tasks in factories - Y-Combinator W2017 onsite interviewee

Hullo Inc

Mumbai, India

SOFTWARE ENGINEER

Oct 2015 - Mar 2016

- Implemented server with audio routing, and a parse-server like datastore (improving call latencies by 5x)
- Architected backend services to add auth and verification for clients also implemented MQTT Push notifications

Qualcomm Inc

Hyderabad, India

ENGINEER

Jul 2015 - Sep 2015

- Implemented code for dynamic updating of tuning parameters for camera focus, as campus recruit

HERE Technologies

Mumbai, India

INTERN

Jan 2015 - Jun 2015

- Designed and developed a web GeoJSON editor using Openlayers and OSM

Projects

Team AcYut, CRIS, BITS Pilani

Pilani, India

SENIOR MEMBER AND LEAD(COGNITION AND ELECTRONICS)

Sep 2011 - Dec 2014

- Team AcYut has built India's first Autonomous Humanoid robot and was sponsored by the Government of India[**INR 4.5Mil**]
- Built and wrote software for cognition, vision and controllers for soccer playing AcYut 4, 5, 6 and 7 from 2011 to 2014Represented India at Robocup 2013, Netherlands and Robocup 2012, Iran

Publications & Awards

PUBLICATIONS

Robust gesture recognition using Kinect: A comparison between DTW and HMM, Optik - International Journal for Light and Electron Optics – 2015

AWARDS

2019 - **Significant Development IP Award**, Award from Patent board for POC on hybrid deep learning models. [Here Technologies](#)

2018 - **Innovation Award**, For successful approval of mobile vision deep learning POC to production [Here Technologies](#)

2013 - **4th Place**, Autonomous Humanoid Robot Soccer - Teen Size, Robocup [Netherlands](#)

Skills

Programming: Python, Javascript, JAVA, C++, C

Web: Django, Express, HTML, CSS

Vision/ML/Data Science: OpenCV, Pandas, TensorFlow, Jupyter
